

White Cedar Shingles

A (Extra)

B (Clear)

C (2nd Clear)

Our natural cedar shingles (untreated FSC® certified) are available in three different quality grades:

- Grade A (extra): No imperfections (only this grade can be used for roofing)
- Grade B (clear) : No imperfections in the visible part (up to 6")
- Grade C (2nd clear): Presence of healthy knots and color shifts on the visible part for a rustic look.

All our shingles can also be delivered :

- Resquared and Rebutted for optimal alignment during installation.
- Kiln-dried for extra stability.
- Treated with our "Atlantic Ecobleach" bleaching process, a water-based solution that guarantees a uniform graying.
- Treated with a water-based solid stain (1,2 or 3 coats)
- Treated with a water-based transparent stain

Easter White Cedar has a natural resistance to rot and insects. If it is not treated it will naturally weather over time to a silvery-gray color. **No maintenance to be done after installation** saving you time and money. Our white cedar shingles come with a 50 years warranty (see www.atlantichort.com for more details).

Kiln-Dried

Resquared
& Rebutted

For a faster and more uniform weathering, we strongly recommend using one of our water-based treatments, factory applied by Atlantic.

Technical specifications

Natural shingles

Product

Eastern White Cedar Shingle

Shingle dimensions

Butt thickness : 3/8" (9.5mm)
 Width : 3 1/2" (89mm) to 11" (279mm)
