# Fire retardant treatment

## "Multi Protect-FR"

A green generation caring  
for environment

Adding new ecological solutions to its line of Eastern White Cedar shingles, Atlantic keeps setting high standards in the industry. With the introduction of our new water based fire retardant treatment, we continue to lead the way with environmentally friendly products.

Environmentally  
Friendly

Waterbased

Repellent to  
insects

In collaboration with ArgoProTek, Atlantic offers its customers fire retardant mulches for parks. Liquid Multi Protect FR meets the highest European standards that a fire retardant can get for wood products. For optimum protection, two treatments of MP FR are recommended.

Atlantic cedar products inc. provides fire protection on all its wood products and also offers the MP FF in liquid form for application to existing products and to extend the protection on products initially covered.

## Multi-Protect-FR

### Fire retardant treatment applied in factory (first step)

Atlantic cedar products inc. offers a full range of factory treated wood products such as:

- Cedar clapboard (other variety of woods also available)
- Mulches (Chips & shredded bark)
- Mulche Fibers (meeting standard #ASTMF1292)
- Cedar Shingles
- Other Wood Products.

## Multi-Protect-FR

### Recommended treatment with fire retardant liquid MP FR (2nd step)

The MP FR liquid is available from Atlantic in several formats to meet the distinct needs of our customers.

The application of our MP FR liquid will maximize the products pre-treated at our factory and / or will extend the initial protection of the fire retardant. For proper application and compliance, please refer to the application Manual of the Multi Protect FR.

This product contains less than 20 grams of VOC per liter more than 12 times less than the minimum required to obtain a LEED certification. In addition, it limits the development of fungi, prevents rot and mildew.
