

## An exterior wood siding without apparent nails! New patented system

This revolutionary new system is designed to eliminate the inconvenience involved in using nails in the installation of a wood siding. Indeed, the problem mostly occurs around the nails: need for touch-ups, warranty not applicable to these areas and especially the aesthetics of your beautiful siding trampled by hundreds of apparent nails.

### The Maxi-clip solution!

It is simply a plastic bracket that is stapled on the forence of the house that enables the installation of tongue and groove siding without damaging it. Easy to install and resistant to temperature variations, the **Maxi-Clip** will allow you to finally really appreciate your wood siding in all its splendor and without nails!

### Characteristics of the Maxi-clip:

- Plastic brackets resistant to the Canadian climate
- Prevents wood distortion
- More effective than the nail to retain the siding to the forence of the house because of its coverage
- Fits on all types of wood siding (even the half-round)
- Easy to install
- No need for touch-ups since there are no nails
- Price similar to factory painted nails
